## SCALPING POLICY

Scalping is a trading strategy which is considered as an unacceptable practice, if used to return profits by taking advantage of internet latencies, delayed prices or through high volumes of transactions targeting tick fluctuations (rather than price movements) where trades are opened and closed very quickly. Such trading behaviour is considered a breach of TRIVE MALTA Terms of Business, as such we reserve the right to act reasonably in good faith and at our sole discretion to:

1. Immediately terminate your account and your access to our servers.
2. Void any trade (i.e., treat the trade as if the trade had never taken place) which was part of any Scalping activity.
3. Close any trade, which formed any part of the Scalping activity, on the basis of our current market price.
4. We can exercise the above rights even if you have entered into (or refrained from entering into) arrangements with third parties relating to the relevant trade and even if you may suffer a trading loss as a result.

Please be advised that all trading activity is monitored, and in the event it is identified that you are Scalping we reserve the right to close your account with immediate effect. TRIVE MALTA will not be held liable for any losses incurred.
